

**QUESTIONS RECEIVED FROM PROSPECTIVE OFFERORS PRIOR, DURING AND  
AFTER THE PRE-QUOTATION CONFERENCE**

**RFQ No. 19RP3818Q0116**

**Road Asphalt in International Broadcasting Bureau (IBB) at Tinang Concepcion  
Tarlac, Philippines**

1. Can we suggest to your good office to propose to all bidders to use cement treated base course for us to have the same scope of work and for you to have an apple to apple evaluation?

If approved by your office, we suggest a compacted cement treated base thickness of either 150 mm (6") or 200 mm (8")

**ANSWER: The USG will not change scope of work and materials to be used for this project. The Contractor is advised to submit quote based on requirements described in attachment 6.**

2. In connection with the above stated project, can we do another site visit for actual measurements of base repair and for thorough site inspection and actual condition of the asphalt pavement?

**ANSWER: Under Section J. Quotation Information C. 52.236-27, the scheduled site inspection was conducted last August 15, 2018. Once the contract has been awarded, the contractor will have the opportunity to visit the site for the actual measurements.**

3. This is regarding the DBA insurance. We would like to inform your office that we will spend P500,000.00 for DBA Insurance and this is a big amount that bidders might not consider. Can you inform bidders for this info for us to have the same expenses computations?

**ANSWER: Please refer to amendment 002.**
